

DO YOU OWN THIS CARD ALREADY?

YES

From **01 January 2019** you can no longer renew this card in its current format. You will need to meet the new criteria, as shown below.

Do I need to act now - will I lose my card after 01 January?

No - your existing card is still valid until its expiry date. You only need to meet these requirements when you renew your card - not immediately after 01 January 2019. For instance, if your card expires on 15 March 2020, you will not need to act until then and your current card is valid until this date.

NO

Since **01 October 2018** new qualification requirements have been in effect for all new applications for this card.

What are the new requirements?

ECS Managers must now follow one of two routes:

Route 1: If you have or meet gold card requirements

If you already have an ECS gold card, or meet the requirements, you are eligible for a Manager's card once you undertake one of the specified Health & Safety courses.

Route 2: Level 4 qualification or above

You can also apply with a Level 4 or above management qualification such as BTEC, degree or JIB-recognised company programme.

PLUS H&S specified course

Whether you take Route 1 or Route 2 you will also need to take one of the following courses:

- Construction Skills (CITB) Site Supervisor Safety Training Scheme (SSSTS)
- IOSH Managing Safely in Construction
- CITB Site Management Safety Training Scheme (SMSTS)
- CCNSG Safety Passport - Supervising / Leading a Team Safety Course

AND the ECS HS&E Assessment (only if you're not exempt by taking one of these courses)

The course above are accepted as a 3-year exemption from the ECS HS&E Assessment. If you gain or have gained one of these courses within the last three years, you will not need to sit the ECS Assessment separately when you apply, until the next point of renewal.

The card style and colour will remain unchanged
